

ASSIGNMENT 2

Storing, Manipulating, and Retrieving Data

Due Date: Friday, 30th October

Weight: 25% (75 Points)

INSTRUCTIONS

Please ensure that you submit your work to the Canvas (**Assignments → Assessment Task 1B → Assignment 2: Storing, Manipulating, and Retrieving Data**) by due date.

THIS ASSIGNMENT HAS TWO TASKS:

TASK 1: DATA LITERACY CREDENTIAL (15 POINTS)

TASK 2: “EXTREME SPORTS” DATABASE (60 POINTS)

LATE SUBMISSION:

- If you submit your work late with no approved extension, you will be awarded zero points.

EXTENSION OF TIME FOR SUBMISSION OF ASSESSABLE WORK

If you are prevented from submitting an assessment on time, by circumstances outside your control, you may apply in advance for an extension to the due date. If you are seeking an extension from the original due date you must apply for it before **Thursday 29th October, 1.30 PM**.

Complete an Application for extension of time for submission of assessable work form and email it to your teacher and the course coordinator. If the application is approved, you may be granted an assessment adjustment.

<https://www.rmit.edu.au/students/student-essentials/assessment-and-exams/assessment/extensions-of-time-for-submission-of-assessable-work>

ACADEMIC INTEGRITY

In addition to meeting assessment timelines academic integrity is about honest presentation of academic work. Students must be accountable for the originality and validity of assessment submission, and not assist others in any form of plagiarism or cheating.

<https://www.rmit.edu.au/students/student-essentials/assessment-and-exams/academic-integrity>

WHAT TO SUBMIT (30TH OCTOBER)

Assignments → Assessment Task 1B → Assignment 2: Storing, Manipulating, and Retrieving Data

TASK 1: DATA LITERACY CREDENTIAL (15 POINTS)

- ✓ To show that you have earned your digital badge, submit a word document file (**MCyourname.docx** □) which will contain the URL from your Credential to show that you have earned your digital badge.

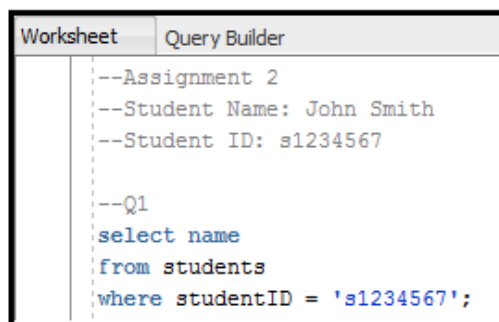

Example: <https://rmit.credly.com/....>

If you don't submit the URL, you will get zero points for this task.

TASK 2: "EXTREME SPORTS" DATABASE (60 POINTS)

- ✓ Your SQL file (**A2yourname.sql** □) which will contain your SQL queries. The file should contain your name, student number, and queries.

Example:

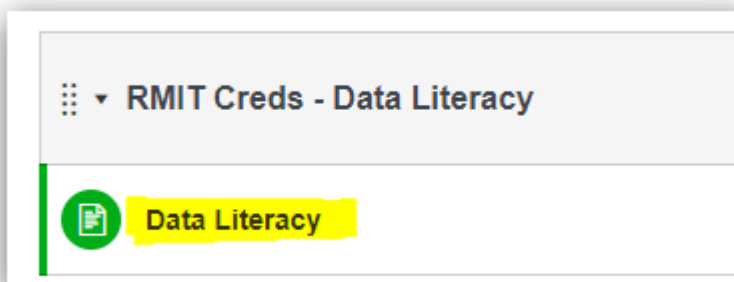

```
Worksheet  Query Builder
--Assignment 2
--Student Name: John Smith
--Student ID: s1234567

--Q1
select name
from students
where studentID = 's1234567';
```

TASK 1: DATA LITERACY CREDENTIAL (15 POINTS)

➤ COMPLETE DATA LITERACY CREDENTIAL

Canvas → Modules → Data Literacy

Number of attempts	2
Pass mark	80%
Estimated completion time	3 hours
Assessment type	Online quiz
Special requirements	None
Marking turnaround time	Allow up to 24 hours for the badge to be issued

➤ REQUEST YOUR BADGE.

➤ SUBMIT YOUR URL FROM YOUR CREDENTIAL TO SHOW THAT YOU HAVE EARNED YOUR DIGITAL BADGE.

TASK 2: “EXTREME SPORTS” DATABASE (60 POINTS)

SCENARIO – “EXTREME SPORTS” SHOPS

“Extreme Sports” is a chain of shops selling equipment, accessories, clothing, and shoes for adventure and extreme sports.

Their business is growing rapidly, and they require a database to work efficiently with the increased amount of data. Extreme Sports management wants you manage their database.

BUSINESS REQUIREMENTS

- A customer can buy items in the shop or order them online.
- The database keeps data about shops, items for sale, customers, orders, and suppliers.
- A customer will open an account (with personal and contact details) in one of the shops.
- The database keeps track on orders. Each order is tracked from the date it was received up to the date of shipment.
- Information about an item contains item name, colour, size, price, and number of items in stock (itemquantityAvailable).
- The shop needs information about suppliers of items.

“EXTREME SPORTS” - SCHEMA

SHOPS (shopID, shopAddress, shopTown, shopPostcode, shopPhone,shopemail)

ITEMS (itemID, itemDescription, itemSize, itemColour, itemPrice, itemQuantityAvailable)

SUPPLIERS (supplID, suppName, suppAddress, suppTown, suppPostcode, suppPhone, suppEmail)

CUSTOMERS (custID, custLName, custFName, custAddress, custTown, custPostCode, custPhone, custEmail, shopID*)

ORDERS (orderNO, orderDate, dispatchDate, custID*)

SHOPS_ITEMS (shopID*, itemID*, shopQuantity)

ORDERS_ITEMS (orderNo*, itemID*, orderQuantity)

SUPPLIERS_ITEMS (supplID*, itemID*, suppQuantity)

DOWNLOAD “EXTREME SPORTS” DATABASE

- ✓ Download “**Extreme Sports**” Database” files from Canvas.
 - **Assignments → Assessment Task 1B → Assignment 2: Storing, Manipulating, and Retrieving Data**
- ✓ Run two files: **A2_create_tables.sql** and **A2_insert_data.sql**.

**WITH A REFERENCE TO “EXTREME SPORTS” DATABASE CREATE SQL
QUERIES TO ANSWER THE FOLLOWING QUESTIONS. (60 POINTS)**

**NAME THE SQL FILE WHICH WILL CONTAIN YOUR SQL QUERIES
A2YOURNAME.SQL**

The file should contain your name, student number, and all queries.

```
Worksheet  Query Builder
--Assignment 2
--Student Name: John Smith
--Student ID: s1234567

--Q1
select name
from students
where studentID = 's1234567';
```

NOTE:

- ✓ For each correctly written SQL query that returns correct output you will get full points.
- ✓ Points will be deducted for each incorrect query. Points deduction will depend on the type of error.

CREATE THE FOLLOWING QUERIES IN SQL:

- Q1** How many orders were made in August 2020? (2 points)
- Q2** Find the total value of all items in the stock (table items). (2 points)
- Q3** Create a mailing label for each customer. Use concatenation to join multiple columns. For example: John Smith, 8 Lygon Street, Carlton, 3053. (2 points)
- Q4** Prompt the user to input supplier id. Based on the user input, show the supplier name and a full address. (2 points)
- Q5** Show item description and price for all items that were sold. Display results in an ascending order based on the price. (3 points)
- Q6** For all customers that made an order, show the first name, email address, and the description of all items ordered. (4 points)
- Q7** List the item ID and item description for all items that were ordered on or before 18th of September. List only different (distinct) items. (4 points)
- Q8** One of the items must be recalled (choose one item from items table). You have to call all customers who have bought that item and inform them about the recall. To do that, you need a list of customers' (who bought the item) first names and phone numbers. Write a query which will create the list. (4 points)

Q9 Which order has the longest dispatch time? Show the order number and the number of days. (3 points)

Q10 Display itemID and item description for items that are available in more than one store. (4 points)

Q11 Which item is the best seller (the highest number of items sold)? Display description and price. (4 points)

Q12 Raise the price of all blue-coloured items by 7.5%. (2 points)

Q13 Discount all items made by a particular supplier. Choose a percentage of discount and a supplier name. (4 points)

Q14 Update a particular order (choose order number) changing its dispatch date to a later date. (2 points)

Q15 Write a query that creates a copy of CUSTOMERS table. Name it CUSTOMERS_COPY. Delete one column from the CUSTOMERS_COPY table and change data type for another column. (3 points)

Q16 The Western Bulldogs (Doggies) are playing finals this year, and all shops are running out of their jerseys. You have to reorder more of them. Display the name, phone number, and email address of all suppliers who supply Western Bulldogs Jersey. (4 points)

Q17 Because of the industrial action in Sydney, the Melbourne shop is running out of stock. They don't know when they will get a new stock, and when they will be able to dispatch the orders. For all orders made after the 20th of September and made by customers registered with the Melbourne shop, change the dispatch date to NULL. (4 points)

Q18 Write a query that creates a view (view_sydney) that contains all information about suppliers from Sydney. Check the data in the view_sydney. (3 points)

Q19 Update any supplier phone in the view_sydney (created in the previous query). Check what happened with the data in the table suppliers. After that, update supplier address for any supplier from Sydney in the table suppliers. Check what happened with the data in the view_sydney (2 points)

Q20 Extreme Sports is opening an online store. For online orders, the shop will accept only credit card payments. Add a new column to the table CUSTOMERS (credit card number), and after that add a credit card number for at least one customer. (2 points)
